Design and Access statement, Proposed replacement conservatory at Slatelands House, Slatelands Road, Glossop.

The object of the exercise is to replace an existing dilapidated conservatory, which is of a design totally out of keeping with this imposing residence currently undergoing renovation. The proposed conservatory will sit in the same position as the previous and the construction process will involve rebuilding and stabalising the existing stone perimeter base wall, as it,s current make up causes a degree of damp penetration into the cellar.
The proposed design has been the subject of discussion with the planning dept and it is felt that the design shown is in keeping with the main dwelling.
Access into the conservatory is via existing double doors from the main lounge and there are external doors on the rear of the conservatory.

Yours sincerely

[redacted]

Mr M Hambleton
