

Proposed

#### Glazing -

4mm Toughened Clear Float (Outer Pane)  
16mm Argon Gas Cavity  
4mm Toughened Low - E (Inner Pane)

Centre Pane U-Value - 1.10 W p/m<sup>2</sup> K (°C)

The structure conforms to Document "L" of the current and pending generation of Building Regulations by achieving a typical overall U-Value of 1.60 W p/m<sup>2</sup> K (°C).

#### Doors -

There will be a set of seven bi-fold doors

These will be fitted with a high security multi point locking mechanism as standard.

#### Ventilation -

There will be Two Manual vents

These vents will be operated using screw jack actuators.

#### Building Works -

All associated building works are to be completed by others prior to final installation of the glass structure.

#### Important Note -

Please do not build from this drawing. If in doubt please contact the office on the number listed below.
