Design and Access Statement: Proposed two storey rear extension to 96 High St. West, Glossop.

At present there is a single storey rear extension to the property spanning part way between existing two storey extensions to both premises immediately attached to and adjacent, this building is in poor condition and is unsightly.
It is intended to replace this building, to fill in the whole of the rear space at ground level and to extend over it to match the attached properties. Construction external materials will be stone walls to match existing and a conc tile roof which will match the existing roof and the attached property. Doors/windows will be in PVCu double glazed units.
The intention is to improve WC and kitchen space and to extend the retail area as business demands.

Mr M Hambleton
