Dear Mr Grimshaw,

APPLICATION FOR CONSENT FOR WORKS AFFECTING WATERCOURSES AND/OR FLOOD DEFENCES - Water Resources Act 1991 (Section 109)

CONSENT REF NO. LT201000272: Footway/Cycleway Construction to Link Monsal Trail To Buxton Station Inluding Construction Of Foot/Cycleway Bridge Over River Wye, Buxton & Monsal Trail, Near Topley Pike, Derbyshire, (SK0970072500)

Thank you for your application for Works Affecting Watercourse and/or Flood Defence Consent received by the Environment Agency on 15/09/2010.

I am pleased to confirm that your proposals are acceptable to the Environment Agency. I enclose Consent Number **LT201000272** issued under **Section 109 of the Water Resources Act 1991**. Please note any conditions, subject to which this consent has been granted. If you believe that any conditions imposed are unreasonable then you have a right of appeal to an independent arbitrator or Government Minister as appropriate.

Please note the Environment Agency requires that:

- **Mitigation measures are put in place to prevent the collapse of the existing masonry wall due to loading from the construction of the new mass concrete footings in the short and long term.**
- **The existing foundations of the masonry wall are not undermined by the construction of the concrete footings.**
- **The existing masonry wall is not used directly as a front shutter for concrete pours due to the possibility of concrete entering the watercourse.**
- **No fill is placed temporarily or permanently in the 100 year floodplain as indicated on Dwg 264/202.**
- **This consent refers to the permanent works. Please note that any temporary works within the watercourse required to complete the permanent works will need a separate consent.**

Please notify the Environment Agency of the proposed starting date of the works between 7 and 14 days prior to commencement preferably via email to *Paul.Davidson@environment-agency.gov.uk*, copying in the consent officer (below), and of completion of the work within 7 days. The submission of photographs (e.g. digital) of the site before and after the works would also be useful.
