Specification brief for Wildcats Premier Multi-Use Games Area

Our Wildcats Premier Multi-Use Games Area is the ultimate in quality Multi-Use Games Area design and construction and is ideal for inner-city or vandal prone areas.

The Wildcats System has been designed to comply with BS 15312 and is ideal for football, basketball, hockey, roller hockey, cricket, etc.

The panels are manufactured from 50mm x 50mm heavy-duty steel grid, with 25mm x 3mm load-bearing bars running one way and 6mm bar running the other way - giving maximum strength and durability. This grid size limits climbing possibilities.

All uprights around the Multi-Use Games Area and the goal crossbars are manufactured using 100mm x 100mm hollow section steel, with a 4mm wall thickness.

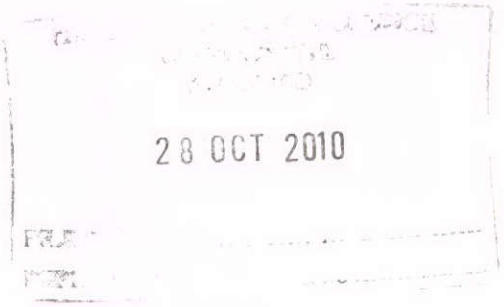

The panels and the uprights are flush to enable continuous play with no ball rebound problems and the noise dampening feature at the panel fixing points absorbs sound and reduces vibration.

The Basketball Goal consists of a 20mm diameter heavy-duty ring to Amateur Basketball Association regulations and a 1.2 metre x 1.05 metre x 19mm thick high-density polyethylene basketball backboard, which is extremely tough and uv stable.

All fastenings are non-standard vandal-resistant.

All steelwork is zinc coated prior to polyester powder painting and has a 5-year guarantee against corrosion.*

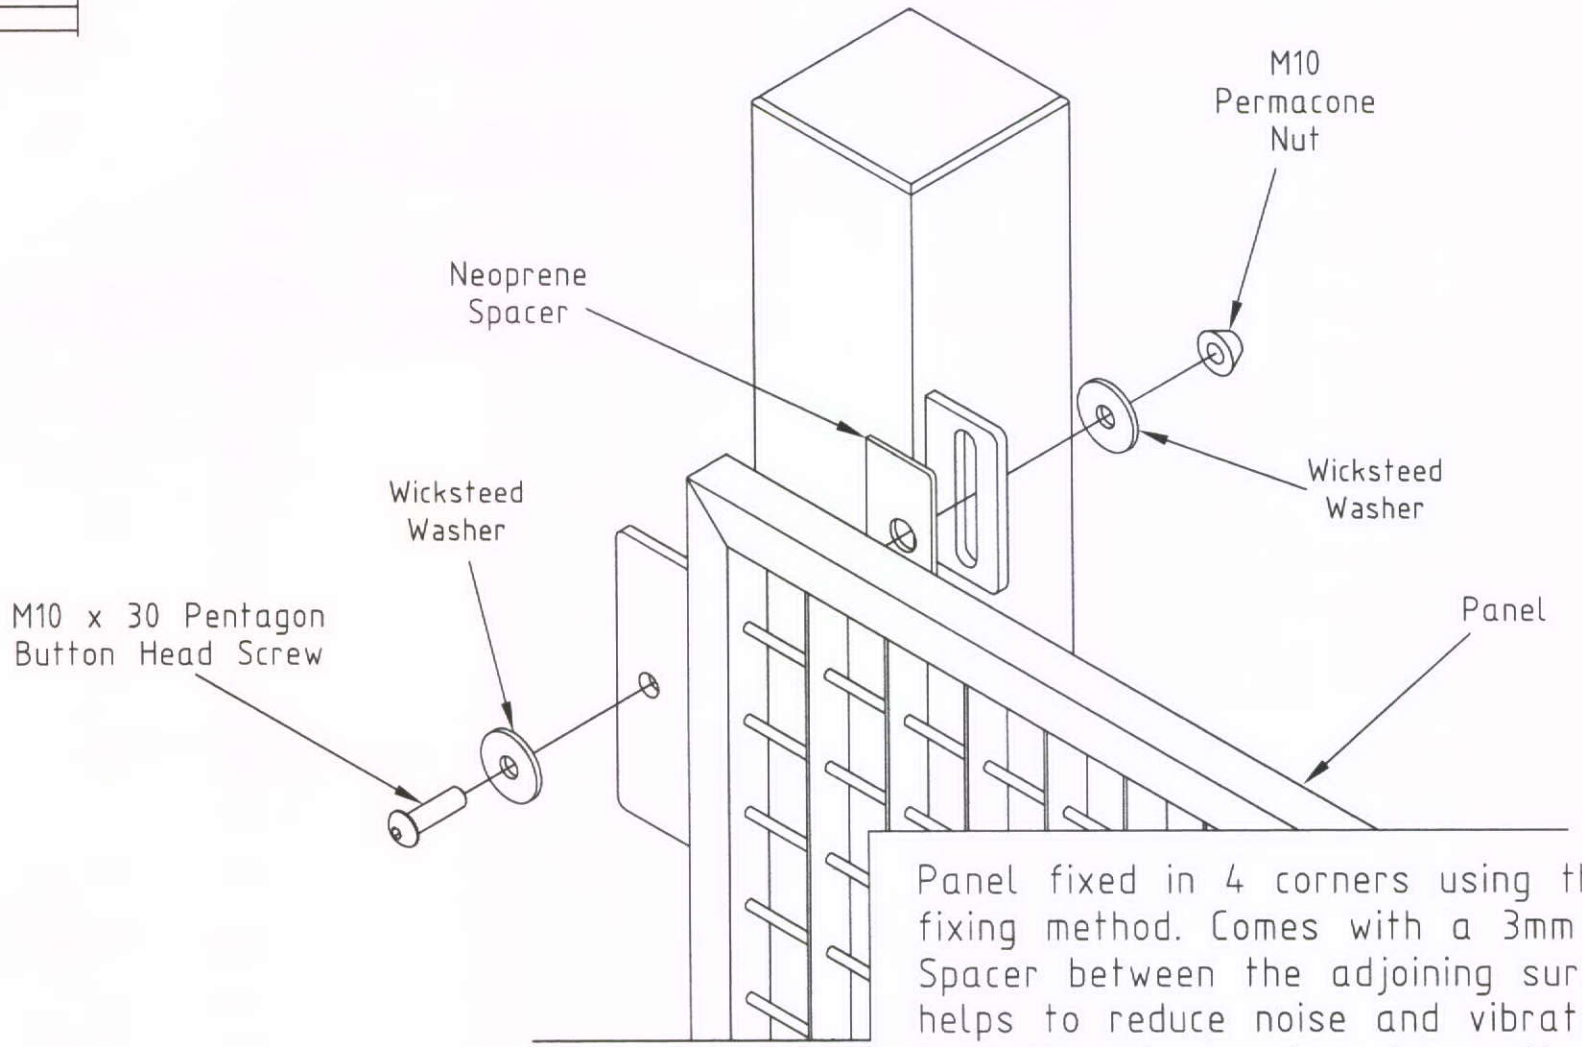

*Wicksteed also give a 25-year guarantee against structural failure. This guarantee, excludes normal wear and tear, accidental damage and the result of acts of vandalism.

DWG. No. SK-625	THIRD ANGLE PROJECTION	DO NOT SCALE - IF IN DOUBT ASK	ALL DIMENSIONS IN MILLIMETRES	A3
