INSTALLATION OF A NEW TICKET VENDING MACHINE AT GLOSSOP TRAIN STATION

DESIGN & ACCESS STATEMENT

The proposal is to supply and install an electronic Ticket Vending Machine on the concourse at Glossop Train Station. This is part of a Northern Rail on going station improvement plan

As the proposal is for a specific localised site to one point on the concourse there is no impact upon the surroundings, landscaping general access or the rest of the station building and infrastructure. Similarly there is no impact upon the Heritage status of the Station by its installation. The unit can only be seen within the concourse.

The TVM is a stand alone, pre made robust, purpose built unit constructed from steel. As such we have no control over the design or construction of this particular machine. Its size is 1000mm wide x 1800mm high x 600mm deep. The unit is finished in blue epoxy.

Its location is to the left side wall as you enter the station concourse. It will sit back against the wall in the location of a wall mounted town plan. The proposal is to re site this plan elsewhere within the station. Please refer to the accompanying drawings and photos.

The TVM will require a new power supply which will be run in metal conduit vertically up to an existing power supply at high level where we can pick up a feed. The TVM will sit on the existing floor and be bolted through. It does not require any other modifications or changes to the fabric, historical detail or features of the building.

The TVM is fully compliant with all current and proposed DDA legislation. Its location is designed to give it maximum access to all passengers as all travellers have to pass close to it.It is intended to ease through flow of passengers during station peak times and offer a ticket purchasing facility when the Booking Office is closed.

We have not consulted with the relevant Planning or Conservation departments to date but would be very happy to meet a representative on site to discuss any issues. Please contact our Operations Director Len Moor on 01937 587777 to arrange if required.
