Design and Access Statement, Proposed internal alterations and alterations to windows/doors, units 1 & 2 Waterside Business Park, Hadfield, Glossop.

Messrs Holdan Ltd currently occupy unit 2, growth of the company has created a need for larger and more suitable office accommodation, they have therefore purchased unit 1. It is intended to create additional office space to the ground and first floor of unit 1 to provide larger offices with external windows and more workable space generally. New windows will be provided on the first floor end elevation and both floors to the front elevation, with the existing roller shutter door being replaced with windows at ground floor, the opening will be retained and infilled with coloured recessed horizontal boarding and the windows as shown thereby retaining the external front elevation appearance.
Access into the premises will be as existing and the internal access will be improved by the addition of facilities specific to wheelchair users.

Yours sincerely

M. Hambleton.

Mr M Hambleton
