## DESIGN INFORMATION.

This drawing shows the design requirements in principle for the elastomeric premises, and is supported by Georgis / Sakers Over Contractors Manager. If in any doubt you must contact the relevant Shopping Manager. Where the nature of the works requires detailed design the Contractor will provide all such information necessary for the works to be carried out in a safe and workable manner. All information established during detailed design, including risk assessments, method statements etc., shall be provided to the Principal Contractor for inclusion in the Construction Phase Health & Safety Plan, which must be altered accordingly.

HEALTH &amp; SAFETY NOTES.

These are used in accordance with the *Revised Health & Safety Plan*. Comments to report adverse register information are sent to the relevant health and safety committee. The work involves working near hazardous activities which could cause injury to those undertaking the works. Groups at risk and the general public. Typical tasks are listed in the operational plan, however the Committee must designate any additional tasks that may be required. The following are the additional tasks that have been identified. Any additional tasks that arise from the work must be identified. These tasks prior to works commencing. Those should not be undertaken if this information is available and/or works could be delayed if circumstances on the register are not assessment method statement to be modified. All work must comply with current legislation, Health & Safety at Work Act 1974, Health & Safety Regulations, Health & Safety at Work Act 1974, Safety at Work Act, Singapore's occupational health and safety legislation and Commissioned before handover and left in partial working order.

## WORKMANSHIP

The site is to be kept clean and free from all waste, debris, rubbish and obstructions at all times and it should be removed from site at regular intervals. All waste is to be disposed of at authorised sites. Contractor to allow for all fees and costs incurred, and documentation of correct disposal should be made available to Geograft if requested. Contractor to take all due care and attention when undertaking demolition, removal or stripping out. If suspected materials are encountered the works in the area to be stopped immediately, sealed off and immediately reported. The Contractor is to ensure that all works and workmanship complied with the relevant code of practice within BS 8000, including all amendments.

ATTENDANCES.

Contractor to allow for attendance on any nominated sub-contractors and include these costs in the tender price. Nominated Subcontractors are to be allowed full use of site facilities and services. Contractor to allow for attendance on nominated suppliers of equipment and to administer their safe unloading, storage and positioning.

NOTE TO COMPLY WITH 17TH EDITION

**SHOOF FRONT**  
The SHOOF FRONT is designed to match the appearance of a real wood shingle, but is made of 100% recycled plastic. It is available in a variety of colors and textures. For more information, call 1-800-451-1100.

**New Hardwood**  
**timber shloofcraft**

Interior partitions and wallings to walls.

All interior partitions must be constructed using 90 x 48mm C.S. 100% recycled plastic. The partitions must be constructed using a double electrical cable to be fitted centrally and must be fitted centrally to the finished face of the wall. All interior partitions remaining to existing walls must be 45 x 33mm profiles or double level with smaller timbers, then finished with two pieces of wood. The double electrical cabling at least 50mm below the finished surface. This is necessary to comply with 17th Edition EE
