9.2 Refresh - Through the Wall ATM Signage

Panel to be V cut, folded and glued from 4mm white aluminium composite sheet complete with 32mm thick foamex fixing panel to the rear.

Either fixed to glass background with vhb tape or stonework using c/sunk fixings.

Acs panel fixed to fixing panel using multi vane brass inserts to one side only.

Anti-tamper fixings used to the top. Panel to be face decorated using flatbed digiprinter with all detail as shown.

Panel finally applied with anti-graffitti matt lacquer for protection.
