HPK/2011 433

THE INLAND WATERWAYS PROTECTION SOCIETY LTD

APPLICATION FOR CONSENT TO DISPLAY AN ADVERTISEMENT

PEAK FOREST CANAL NEAR WHALEY BRIDGE
GRID REF. SK.01242 82311

ADDITIONAL INFORMATION

PAYMENT OF FEE

This is to be arranged by Paul Armstrong internally within the Borough Council as copies of e-mails attached. Mr. Armstrong has been advised that this application is being lodged.

SECTION 11 (a)

The height from the ground on each side of the canal is 2.22m. The height from NWL (normal water level) is 2.64m. Both taken from water/ground to bottom of the steel beam of the bridge. Please note that sign digitally superimposed on to the bridge appears larger than the finished actual sign to be placed. Dimensions on the image (650x3162x40mm) are correct.

SECTION 11 (Type and materials – Sub- Section e)

Materials of the proposed sign:

Di-Bond Board, a 5yr outdoor material that will not warp. Print will be on to an outdoor self adhesive 5yr vinyl printed using Mimaki JV33 Eco Solvent Inks with an outdoor 5 yr over laminate to protect against the elements. The print will be wrapped around the edges to stop water getting between the board and the print, a common cause of print adhesion failure.

N.B. At Section 9 (Advertisement Period) we have stated 20 years but the life stated above is estimated 5 years. We will renew the sign as required in the light of experience.
