MORRISON'S SUPERMARKET
Bakewell Road,
Buxton
SK17 9TB

Design & Access Statement – January 2012

1) Introduction

Morrison's wish to implement a program of works installing new garden centres to improve the store's range of services and products. The garden centre's will be constructed in various forms depending on each individual store design.

2) Proposal

The garden centre structure will be located in the following position;

Under an existing Canopy –

External garden centre using the existing store canopy (as above photograph) as shelter and a green steel mesh fencing (RAL 6005) fixed from floor to canopy eaves height for security of stock during closed hours.
A secure door (RAL 6005) will be integrated into the steel mesh fencing will allow access for both staff and customers during trading hours.
Stock on trolleys and pallets will be located outside the secure area during opening hours and returned to the secure compound when the store finishes trading. Inside the secure area will be a till point and hanging POS sign. Water and electricity points will be provided by extending existing services from within the store. Extra lighting is to be added where required.

3) Layout

The layout of each garden centre varies depending on the location within the store. However, all garden centers follow the same concept. Each garden centre has the same fixtures to hold stock, following a similar layout and all have one till point, a water point and an entrance bulkhead sign.

4) Access

All garden centres will have level access from the existing floor levels and comply with DDA regulations.

5) Conclusion

The proposed installations do not contravene any planning policies and are deemed appropriate for the stores.
