HPK/2012/0278

28 MAY 2012

Design and Access Statement

We are looking for a two story rear extension, to be built in natural stone to match the existing (sourced locally), and a blue slate roof to match existing. Windows are to be done in wood, and the existing uPVC windows to be replaced for wood also to be more in keeping with the local area. There will be no change to the road side view of the house, or any alterations to parking / access.

My wife and I are expecting our first child and this extension is necessary for us to continue living in this house once our family arrives. I work in the hamlet, and due to the nature of my work I must remain in close proximity.
