Design and Access Statement

We would like to erect a garden shed for the storage of garden equipment and tools. The position chosen is the part of the garden furthest from Sandy Lane and therefore reducing it's visibility. We have chosen the square shape to suit the proposed site without having to take away any shrubs or trees and at the same time being able to site it in an established area of the garden to again reduce the impact. We would like to paint the shed in a garden green colour to match existing garden furniture.
