Faye

My sole reason for extending this application is to make sure I do not get in trouble with yourselves, I do not plan on running 90 events through the year. We currently hold stock car and banger events at the raceway and are members of the Oval Racing Council International, BriSCA Formula 1 and BriSCA Formula 2. We stage events which attract drivers from all over the UK and abroad and feel this must generate money in the local area with Hotels, Fuel etc. Buxton is a well liked, fast track and we have had no major issues with the council or police since the place started operating some 45 years ago. Anything the council ask us to do with the stadium we do without hesitation.

We are currently stage around 25 Stock Car events through the year and have recently started Drifting which has dramatically reduced the drifting on the Cat and Fiddle road, as they now have somewhere to do it. This is a fact also as people on the day say they don't do it anymore because they have Buxton.

The reason the extension is needed is we are currently staging around 45 events through the year, We have no plans to increase this amount dramatically as we are a weekend stadium staging events from March till November.

With regards traffic, there has not been any major issues with this and we do our very best to keep the lane to the track clear as we understand and respect the locals, which is also why we try to keep the noise down and do not run into the night.

Any litter that is dropped in and around the stadium is collected by us and we use the bins which we get from the council to dispose of this.

We at Buxton like to keep ourselves to ourselves and do our best to keep all people happy.

I hope that this information help.

King regards
