GLADMAN

Proposed Residential Development – North Road, Glossop

We value your feedback ...

Thank you for attending today's event. We would be grateful if you would take a few minutes to record your comments on the proposals.

Would you like to suggest any changes to improve the proposals? How much housing do you think is appropriate? Is the on-site open space appropriate or would a contribution to existing facilities be preferable?

Appreciate the explanations offered about the need for more housing and how it ties in with Government plans/objectives. Still think the scale of this development is too big (ie 150 houses = 300 cars) for the area to cope with - ie. school/work movements.

Are there any other comments you would like us to consider? Are there any additional community benefits that should be provided? Could the current transport facilities be improved?

The site is very important to Glossop's character as a buffer between Glossop - Hadfield/Padfield. Also it would be very visible from the high roads approaching Glossop - any development would need sensitive development relating to "skyline" issues. A smaller development would gain more local support. Thankyou.

GLOSSOP'S INFRASTRUCTURE CAN'T COPE WITH CURRENT LEVELS OF HOUSING - GLOSSOP IS FULL!!

Are there any other comments you would like us to consider? Are there any additional community benefits that should be provided? Could the current transport facilities be improved?

GLOSSOP DOESN'T NEED ANY MORE HOUSING

Proposal of up to 150 is far too many – will lead to too many cars on already busy roads. North Road & Spire Hollin in particular.

Are there any other comments you would like us to consider? Are there any additional community benefits that should be provided? Could the current transport facilities be improved?

Build less.
