Stables

In the winter of 2012/13 we had some severe frost and snow and we had considerable concern about the welfare of some of the animals on the farm. This prompted us to erect stables for 4 horses and a wooden shelter for the alpacas. We realise with hindsight that planning permission should have been sought prior to the erection of the stables and this was a grave error on our part.

Polytunnel

This has been erected to grow vegetables, flowers and plants for non commercial use. The polytunnel also provides training facilities for young people with barriers to learning (see application PP-02936183).

Metal Storage Sheds

Two off the shelf (B&Q) metal storage sheds for the storage of animal feed stuffs.
