Design Access Statement

BUXTON TRAIN STATION

INSTALLATION OF TICKET VENDING MACHINE

This design access statement is to support the application for Listed Building Consent for the provision of a ticket vending machine and construction of associated foundations at Buxton Railway Station, Station Rd, Buxton, Derbyshire SK17 6AQ

Aerial Photograph of the Station

Buxton railway station is a terminus station operated by Northern Rail. The station building and the railway tracks are on a north easterly axis. There is car parking provision to the front of the building. The access from the car park and the station frontage is at a grade level providing a gentle unhindered access to the platforms.

The proposed ticket vending machine is to be located on the platform is an Astreo card and cash machine by Parkeon. The ticket machine will be supported off new concrete foundations to details shown on the drawings.

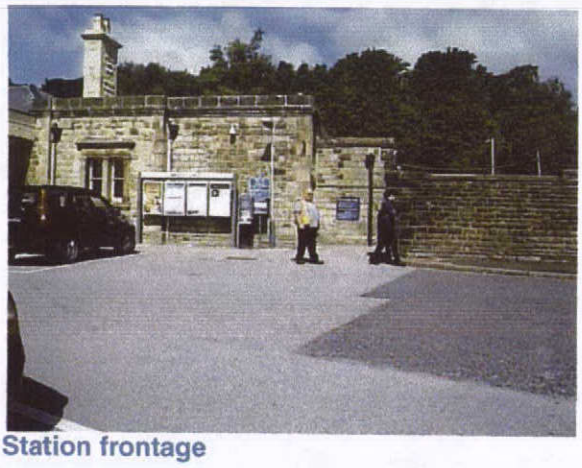

By its very nature, the pre-existing access provides unhindered access to the proposed machine and it will be fully accessible for wheelchair and ambulant disabled.

The premises are easily identifiable by virtue of the existing signage.

The series of photographs below show existing access from the station frontage to the platform.

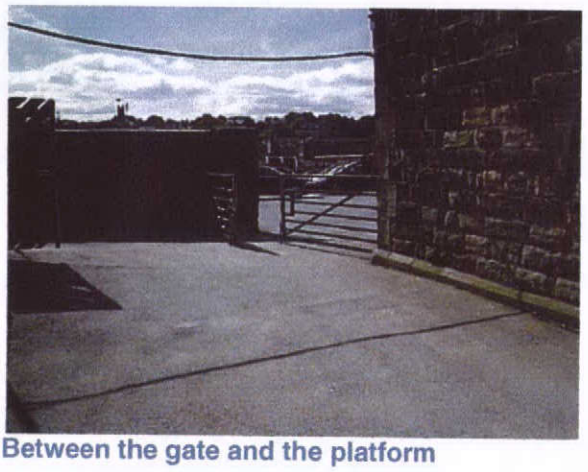

The approach to the station frontage

Station frontage

Side entrance gate off the front car park

Between the gate and the platform

Thoroughfare between the front door and the platform via the ticket office

Impression of the new ticket vending machine in the proposed location
