Planning Ref: 1837652

Our Ref: Thomas

DESIGN & ACCESS STATEMENT

This proposal is to install 6 no new white uPVC windows to the rear elevation these are to replace the existing white rotten timber frames set into the stone mullions and transoms. Due to their extremely exposed position white uPVC has been chosen as a more durable material. The conservatory replaced previously at the property has also been constructed in white uPVC.

Access and parking space can all be achieved on site without the need for road obstruction.

During the construction process there will be a maximum of 4 people working on site at any one time.
