Notes to Applicant

(1) Informative Note for Applicants/Agents for Developments within Coalfield Standing Advice Areas.

The proposed development lies within a coal mining area which may contain unrecorded mining related hazards. If any coal mining feature is encountered during development, this should be reported to The Coal Authority.

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires the prior written permission of The Coal Authority.

Property specific summary information on coal mining can be obtained from The Coal Authority's Property Search Service on 0845 762 6848 or at www.groundstability.com

(2) The development is situated within 250 metres of a historic landfill site. Because of the potential risk to human health, before development the applicant should ascertain whether gas protection measures are required. If necessary, a gas impermeable membrane should be incorporated within the structure along with a ventilated sub floor area. Any services entering/leaving the structure should be located above the gas impermeable membrane or alternatively, adequate seals will need to be provided if the membrane is to be breached. The details of the gas impermeable membrane and with particular attention to the joins with any existing structure and seals around any services, plus details of the sub-floor ventilation should be submitted to Building Control for approval prior to the works being carried out.
