Introduction

The multi-use games area at Chapel en le frith Memorial Park obtained planning permission in October 2010 (HPK/2010/0569) and was completed in October 2011 and is now a well - used facility within the park.

The Parish Council would now like to extend the fencing at the goal ends only, by 900mm in height to reduce the risk of balls being thrown and kicked out of the MUGA into neighbouring properties and the adjoining play areas.

Existing Facility

Proposals

The existing fencing heights are 1m high to both long sides, rising to 2m high and 3m high behind the goals. This would extend to 3.9m and 2.9m behind the goal ends and the fencing down each side would remain unchanged at 1m.

Picture Illustrating the Proposed Fencing Extension

The proposed fencing colour will be dark green to match existing to help integrate it into the park.
