Design Statement

The proposal is to install replacement signage as part of a national re-signing programme following the applicants corporate re-branding.

The main fascia will be removed and replaced with a Blue powder coated externally illuminated Aluminium fascia of an identical size. The existing text will be replaced with “The Co-Operative Bank” and will be made using moulded Silver and Acrylic letters faced with Vinyl.

Two Blue powder coated aluminium panels will sit over the external doors, either side of the fascia sign.

The hanging sign will be replaced with a blue powder coated Aluminium panel and will be internally illuminated with white and blue Acrylic lettering faced with Vinyl.

The colours will change with the background to be painted blue and “The Co-Operative” text in blue and “bank” text in white.

Access will remain unaffected.

The result of the above is likely to ensure the economic development of the bank and its contribution to the local community in particular, and the public in general.
