Description

Commercial kitchen extraction canopy hood with built in extractor fan for fast and efficient kitchen extraction. The extraction canopy is suitable for both gas and electric cooking equipment, and comes with easy clean removable baffle filters and full length grease channel for easy cleaning.

Materials

The extraction hood is 100% commercial stainless steel construction. The stainless steel has an elegant brushed finish and looks clean and modern.

The fan motor is a high quality twin inlet centrifugal design high volume and high pressure extract fan with high quality ball bearing construction that runs at a incredibly quiet 48dB(A)

The extract fan motor has 4 speeds that are easily selected from our rugged 4 step speed controller.

Extraction Canopy Hood Kit Contents
