Currently selected product: 250mm

- Ventilation hood for air exit above roof, suitable for both industrial and comfort ventilation.
- Air is ejected in an upwards jet to avoid contaminating the air in the vicinity of the hood.

[View more similar products in Galvanised Jet Cowls](#)

- Ejection is so effective that you can install a fresh air inlet in the immediate vicinity of the hood
- Contains internal rain funnel to collect rain and snow: drained out of the hood through a hose.

- Our fittings are produced in accordance with DW144, and have a rolled edge for safer handling and improved alignment.
