

REAR ELEVATION
WINDOW UPGRADE

FLATTENED FRONT ELEVATION
WINDOW UPGRADE

SCOPE OF WORKS FOR WINDOW UPGRADE

Other than GFW1 (ground floor window one) which shall remain as existing, all remaining windows to be replaced with new white Upvc triple glazed opening windows with high level trickle vents. Existing windows are mainly a mixture of painted steel or Upvc which are rusting and failing respectively. SFW6 to the rear elevation is presently single glazed painted softwood and is now rotting due to access difficulties for maintenance. Windows to be an exact match to the existing in glass sizes, type and appearance and have internal Upvc window cill, high-quality white waterproof frame sealant inside and out.
