Submission: Neither

Comments: There are no details of the proposed diversion, but I would object if this meant the path deviating significantly from its current route. The current route connects with Shallcross Mill Road and allows for a quiet route to/from the liner park and Shallcross incline paths. It is difficult to see how the same degree of amenity could be provided from a diverted route, particularly if this meant having to walk along the road any significant distance. I also agree with the Town Council that it is in acceptable the footpath remains closed with no alternative provision during works, with no signage heading from Tunstead Milton until you reach the development. It should be possible, utilising temporary construction barriers, for the developer to create a temporary and permanent safe route through the site to permit the community access along this popular route up to the scenic Long Lane.
