9 MEADOW CLOSE
WHALEY BRIDGE

**SINGLE STOREY EXTENSION
ADDED TO PREVIOUS
EXTENSION
EXTENSION TO EXTEND
BEYOND THE REAR WALL BY
7.10M, MAXIMUM HEIGHT OF
THE EXTENSION TO BE 2.50M,
HEIGHT OF THE EAVES TO BE
2.50M.**

**(HOUSEHOLDER
NOTIFICATION APPLICATION)**

MAIN ISSUES

Compliance with the GPDO (2015)

DESCRIPTION OF SITE

The proposed site is comprised of a detached brick and tile dwelling and its associated curtilage, located in the Whaley Bridge Ward. Additionally, the proposed site is within the Built-up Area Boundary, where positive development is encouraged to be concentrated. The site is enclosed by neighbouring dwellings and their associate curtilage on the North, South and East boundaries. No. 7 Meadow Close is located to the North of the proposed site and No. 11 Meadow Close is situated to the South. The rear curtilages of No. 12 Meadowside and No. 14 Meadowside are positioned to the East of the site. The Meadow Close highway runs adjacent to the proposed site along the West.

PROPOSAL

The proposal is for a single storey rear extension. The extension will have a maximum height of 2.50 metres and maximum eaves height of 2.50 metres measured externally from natural ground level. It will have a depth of 7.10 metres (combined with the existing extension to the rear of the dwellinghouse). Materials used in the construction of the extension would match those used as part of the construction of the existing dwelling, including brick and white UPVC.

OFFICER COMMENTS

In conformity with the rules stated within the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended), the proposed single storey rear extension to the dwellinghouse fully adheres to the criteria stated by Schedule 2, Part 1, Class A of the GPDO. This sets out criteria to enable the classification of whether a householder development is permitted or not:

Schedule 2, Part 1, Class A.1 (a) states that development is not permitted if the use of a dwellinghouse as a dwellinghouse changes. The rear extension will be solely used as part of the living space of the residents to fully maintain its status as a dwelling, thus making it permitted development.

In accordance with Class A.1 (b) of the GPDO, the ground coverage of the building combined with the addition of the rear extension would not exceed 50% of the total curtilage of the dwellinghouse.

Class A.1 (c) and (d) confirm that the maximum height of the roof and eaves of the

extension cannot exceed the maximum height and eaves height of the existing dwellinghouse; otherwise the development is not permitted. Neither the height of the roof or the eaves would exceed the roof or eaves of the existing dwellinghouse.

As the extension would not be constructed on the principal elevation of the dwelling, nor would it front the highway and form a side elevation, this would classify as permitted development in compliance with Class A.1 (e.i) and (e.ii).

This is an application under the larger extension procedure of the GPDO, therefore Class A.1 (f) does not apply. Under Class A.1 (g), the dimensions of the proposed development are within those permissible. With a maximum height of 2.50 metres and a combined depth (between the existing and proposed extensions) of 7.10 metres measured externally, the extension would be under the 4 metre height limit and fit within the 8 metre projection limit on detached dwellinghouses.

The enlarged part of the dwellinghouse does not have more than a single storey, therefore Class A.1 (h) does not stand applicable to the proposed development.

The proposed extension complies with permitted development regulation Class A.1 (i). The height of the eaves would not exceed 3 metres, measuring 2.50 metres externally from natural ground level.

Class A.1 (j) states that the enlarged part of the dwellinghouse cannot extend beyond a wall forming a side elevation of the original dwellinghouse unless it abides with certain regulations. The proposed extension will only project from the rear elevation, therefore this rule is not applicable.

With regard to Class A.1 (ja), any total enlargement including the addition of further enlargements to existing enlargements, cannot exceed Class A.1 (e) - (j). The total measurement of the proposed extension, combined with the existing extension (cumulatively) would not exceed 8 metres, would be below 4m in height and with an eaves level of 2.5m, therefore meaning that it is permitted development.

The proposed extension would not include the addition of any new ornamentation features such as a verandah, microwave antenna, a chimney or flue or the alteration to the existing roof of the dwelling. Therefore, Class A.1 (k) is not applicable.

The proposed site does not fall within article 2(3) land, therefore Class A.2 does not apply.

In order to accommodate to the conditions raised in Class A.3 of the GPDO, the proposed development would be constructed from materials which would harmonise with the existing colours, textures and materials of the dwellinghouse. In accordance with Class A.3 (a), all proposed materials are set to match those used in the construction of the existing dwelling, including brick and white UPVC.

No neighbour objections have been raised with regard to the proposed extension.

Permitted development rights are intact for the property.

CONCLUSION / PLANNING BALANCE

This notification falls within the framework set out within Schedule 2, Part 1, Class A (g) of the Town and Country Planning (General Permitted Development) (England) Order 2015. Due to there being no neighbour representations raised, there is no requirement to consider neighbour amenity, thus the proposal can proceed as permitted development. As a result it does not require planning permission.

OFFICER RECOMMENDATION: APPROVE
