4. Description of Proposed Works

Please describe the proposed works:

The home owner has old timber sash windows which are extremely draughty and suffer considerable water ingress. Many of the windows are rotting and are glazed with a single pane, which poses a considerable danger to their young children. The proposed work involves installing new PVCu double glazed sash windows throughout the property which are identical in design to the existing timber sash windows. To maintain the character of the property all new windows will have timber style jointed frame corners and well as deep bottom rails and run-through sash horns. Our client has chosen to have white grain effect frames which are in-keeping with the surrounding dwellings. All windows will double glazed with high insulating A-Rated sealed units and will have a toughened lower glazed section to comply with Building Regulations.
