Submission: Objection

Comments: The closure of this popular footpath has already adversely affected many walkers, and I fail to understand why the builders have been allowed to keep the area closed off, well past the permitted date.

It provides the only level route for walkers. There is no footpath on Elnor Lane and to force walkers to use a busy through road, which has no walking space or protective kerbed area, and that is far too steep for anyone not physically fit, is both discriminating and dangerous.
