No prior consultation with the Highway Authority in connection with the placement of cycle stands within the public highway.

The section of footway fronting the building carries a significant footfall, being in a town centre location at a busy vehicle and pedestrian junction. The existing footway width is already relatively constrained, as it contains necessary highway infrastructure associated with the signalised crossroads junction, and there are 2 No busy controlled pedestrian crossing points on the building frontage itself. The Highway Authority would therefore not be in a position to support the placement of cycle stands identified in the current application, on grounds of highway safety and the efficient and safe movement of pedestrians on the public highway.

On the basis of the application proposals as submitted the Highway Authority recommends the application be **refused** on the basis of the above. Alternatively, the applicant may wish to remove this element from the proposals and enter into negotiations with the Highway Authority to see if there would be the opportunity for cycle stand provision elsewhere in the vicinity, to pursue their carbon neutral project.
