The building is an overhang attached to the side of the stables which is designed to store the muck trailer which is used to remove the waste from the animals stables and the hay which the animals eat. This will stop the used content of the stables and hay blowing about into the residential area which surrounds it. It is part of the regeneration of the fences, road to the stables and the improves the general appearance of the buildings. It also acts as a health and safety feature to the local residential area as it enable stable waste and animal feed to be more hygienically managed. It also enable the person mucking out stables to manage the waste in inclement weather conditions as throwing stable waste into a trailer in the wind can often end up with the stable manager wearing the contents of the bucket. The lean to is 6.5 metres in length (the same as the stables) and 4.2 metres in width, 2.4 metres to the roof.
