Comments: We feel that by introducing a detached family dwelling on to a very restricted site would result in a cramped form of development that would depart from the established pattern of housing on this side of the road and would severely compromise the character of the street scene. The impact of the dwelling would be compounded by the loss of front boundary hedging and the hard-surface frontage which would leave limited scope for landscaping. We would request that the Planning department ensure that adequate drainage is provided around the dwelling to ensure that surface water from the building, as well as the paths and driveway do NOT drain down onto our property. We would also respectfully request if the plans are accepted, that building work would NOT be carried out on a Sunday or during the hours of 6pm to 8am. during the working week.
