Categories:

Dear Sir/Madam

I am writing to you in response to the above planning application.
The additional houses planned will be too much for the local area. We all know that Fairfield road is complete deadlock at school time but you fail to realise that other roads are affected due to traffic and narrow roads.

Chatsworth road
Elizabeth ave
Pictor road
Bench road
Victoria park road
Queens road

The above are all gridlocked at school times and around 5-6 and the conditions of each road are very poor.
We can walk to Buxton junior school quicker than driving or the bus

Other issues are
The quarry is still blasting at the back of Fairfield.

Fairfield juniors will not be able to cope with the numbers

There are no facilities for young - teenage children which results in children hanging around in groups causing anti-social behaviour.

Secondary schools in buxton will also struggle to cope with numbers. schools in chapel and surrounding areas have been at full capacity for years so there is no overflow. My daughter currently attends hope valley college which sees a growing number attending from Buxton each year, for which buxton parents have no help with costs

Finally and most importantly is the fact that Fairfield used to have lots of green spaces which could be enjoyed by adults and children. Playing or walking dogs.

I lived as a teen on cromford lane when the new houses where built in the 90s. My father put it this way We move from the city to a rural town to enjoy the country side, London has only just started to learn not to pack people in. Yet many years on High peak council is still making the same mistake and destroying this areas.

Kind regards
Paul Noble
