Submission: Neither

Comments: The new dwelling overall height may interfere with the telecommunications/phone line(s) and pole that are currently supplied to housing on Silverlands. This may have a bearing on the planning as residents on Silverlands, in proximity to the development, have not been notified in the circulation and are probably unaware that they may be affected by the development. Costs/practical considerations of relocation of phone services may need to be considered and Silverlands neighbour's communications services could be affected.
