Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including details of proposals to alter, extend or demolish the listed building(s)

Repair and restoration of all sash windows.

Local, national and global imperatives demand all possible and sustainable steps to protect the planet, to conserve energy and to minimise heat loss from our buildings. This proposal seeks to minimise heat loss from the property, which is currently enormous as a result of universally single glazed and ill-fitting windows; and to provide the whole property with sash windows which function as they were originally intended, to enable maximum control over internal summer and winter temperatures.

The proposal is to refurbish all the existing sash windows, maintaining their appearance and rendering them fully operational and efficient. The intention is to repair and retain the original wooden sash frames. New draught proofing will be fitted throughout and the windows will be reglazed with double glazing, putty pointed to maintain their external appearance. The result will be attractive, energy efficient and easy to operate windows in their original wooden frames.

Currently the windows are in poor condition and do not perform as sash windows should. All the upper windows and some lower windows have been painted in but they have often been left askew, looking unsightly and leading to significant draughts. Several sash cords and sash catches are missing and the existing draught proofing is in poor condition.

The glazing also needs to be improved. The proposal is to use double glazing throughout; for certain windows (e.g. the front bays) this may be slimline 11 or 12mm double glazing, as is now increasingly used in listed buildings. For the service windows at the rear of the building – the kitchen and bathroom – 14 mm glazing is proposed, not least to minimise condensation in these areas. Through these improvements the original wooden sash appearance of all the windows will be maintained whilst making them easy to operate, especially the kitchen and bathroom – an important consideration for less agile people.

Secondary glazing is particularly awkward to use in sash windows as it impedes use of the upper sashes. It is also the case that secondary glazing, as evidenced in neighbouring properties, leaves a clear shadow around the edges of the frame, is unsightly with its extra bars when opened and is generally more conspicuous than double glazing.

The front elevation of the property, comprising a sitting room, study and a dining room, overlooks Broad Walk. Beneath the property is a commercial premises, Broad Walk Dental Practice, whose name is inscribed on windows with opaque glazing. The side elevation, comprising bedrooms, faces the very small bathroom windows and landings of Milton Court, a block of retirement housing built in 1971 and with UPVC double glazing. The rear elevation, which includes the kitchen and the bathroom, overlooks a sunken yard off Hartington Road and includes several service windows with, no longer uniform, frosted glazing. Photos of each elevation are attached.

Only Building Consent required if retaining original glass and most of timber.
Draught proofing, secondary glazing preferred.
Planning permission and listed building consent required if double glazing being proposed, with justification and with spec of materials.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
