Dear Sirs,

I am writing on behalf of Holy Trinity Dinting Cricket Club. Where I Dan Carter hold the position of club treasurer.
Simmondley Lane
Glossop
Derbyshire
SK13 6PQ

As a club we are concerned about the proximity of the proposed development to our own boundary.
Has there been any thought around the safety aspect of hard cricket balls which could not only damage properties but could also injure people if they happened to be hit over our boundary?
I would urge a stipulation that if planning was approved, at the cost of the developer 30m high net fencing should be erected along the boundary lines (inside the proposed development).
We are aware that this was stipulated on a development (The old bus depot) in old Glossop.

As a club we would also like to ask what is the intended use in the future for the piece of land which is council owned and sits between our boundary and the proposed development.
May we also ask why it was necessary for a geo testing company to dig test holes on this piece of "Council owned" land at the same time they were digging on the proposed development site?
Please see attached file 506746 which I have marked the council owned land in yellow.

Kind regards

Dan Carter
