Submission: Objection

Comments: The planning of so many housing units is not sustainable for a small town like glossop. There is not infrastructure in place to support the amount of people and cars that will move to the area. The traffic is already a problem having to stand long delays going into town or getting out making our co2 emissions a problem. On the other hand, where are the doctors, hospitals and schools needed to support this planning? These infrastructures should be put in place before any planning is approved.
