To whom it may concern,

I am emailing to express my concern for the building of the 94 houses and 6 flats on the land around Adderley Palace.

I think that the scale of this building site will have serious impact on the local traffic in and out of Glossop. We are already struggling commuting. This is before the completion of the 50 new build houses in Gamesley. This will be bringing on average two cars per household of extra traffic to our already strained roads in Glossop.

Also I feel this will add extra pressure to our local services, i.e the schools, doctors, dentist and community spaces. I strongly feel these need to be seriously addressed before any more housing proposals are granted.

I would like to see the Glossop bypass and the land of the former Glossopdale school site to be used to increase our local services in the area. In my opinion we need cater for the current and any future residents in the area before any more houses are built.

With these points I have brought forward, I appose to the planning of the houses on the land around Adderley Palace.

Kind Regards

Stephen Metcalf
