Submission: Objection

Comments: the traffic congestion will only increase, the local primary school is already in a high pollution area and adding more cars from 100 hundred houses can only make thungs worse, not better. The risk of accidents around child safety will only increase. the strain on local services is going to increase, especially around NHS, school places and nursery places. the effect on local wildlife and the wider ecosystem will be significant with a loss of rare species such as sparrow hawks, badgers and deer to name a few. I fail to see how this is meeting local needs as there will be no affordable housing for people currently living in Glossop. The area is currently used by walkers and schoolchildren who need to cross the already busy A57 to get to the local secondary school in Hadfield. I completely object to this development as it does not offer any positives to the local community in any way and appears to offer lots of negative impacts to the people and wildlife.
