Subject: objection to Wain Homes planning application HPK/2022/0456

I would like to register my objection to the above planning application on the following grounds

Local roads/ infrastructure already beyond capacity -

- Between the hours of 8am and 7pm 7 days a week it is frequently quicker to walk into Glossop town centre than it is to drive as vehicles queue half a mile all the way along High Street West.
- Vehicular access to and from the town has become almost impossible with daily queues for much of the day from the town centre to the M67 and from the M67 back into the town (not unusual for this 4mile journey to take 45minutes or more)
- Over the last 30 years thousands of new houses have been approved and built without a single improvement to the supporting road and rail networks
- Glossopdale school, although only completed and opened 4 years ago, was unable to cope with pupil numbers from day one, without even considering the increased demand caused by subsequent house building since.
- Environmental pollution caused by the current continuous traffic congestion already causes detrimental health outcomes for local residents, without further pollution from the additional 175+ vehicles this housing development would add to the roads.
- Current health services e.g.Dental and GP practices are already struggling to meet current needs with dental appointments (if you can find an NHS dentist) stretching months into the future and GP appointments multiple days/a week

The burden of providing locations for new houses needs to be more evenly spread across other towns in the region that during the same period of time have seen comparatively much lower numbers of planning application approvals

Regards
