Hello, I have tried to respond via your website but my response keeps timing out and says that the site can't be reached!

Basically I wish to object to the proposed housing development around Adderley Place.

I have lived in Glossop for 44 years. During that time I have witnessed massive housing developments but no improvements to the infrastructure. Everyone is aware of the problems at the end of the M67 and Mottram Moor and hopefully we will get a solution to that in the next few years. However, this won't help people driving in and around Glossop town. There are often massive tailbacks on the A57 from Dinting Vale to the town centre. I am not aware of any proposals to improve this. It could be argued that we should take the bus into town and use our cars less. However there is no credible bus service from Simmondley and many other areas around Glossop. In conclusion I believe that this proposed development be refused planning permission until the road access/bus services improve.
