Submission: Objection

Comments: I object to the planning on the following basis

1. The creation of additional road users

Glossop is already extremely congested with Dinting Vale and the high street being severely congested at peak times.

Building a 100 new homes with an average of 2 cars per home will add a further potential 200 cars to already congested road.

Trying to drive down Dinting Vale is difficult at peaks times is a nightmare at the best of times if you add in the disruption that would be caused during the construction phase it is noted that there is the planning statement that substantial work will be required to create the new road to the site due to the levels and that a S278 agreement will be required assumably this will involve restricting traffic movement on dinting vale Any works to create a new access will obviously create major issues with traffic during the construction phase .

2. Public Services

as noted in many other objections the public services in Glossop are already oversubscribed with finding services such as a NHS dentist impossible.

3. Ecological Impact

The Ecological survey produced by the developer makes it clear the land is of ecological importance and has been noted in the report is of value to both Bats and Badgers in addition to this there is a population of deer that regularly graze the land I have regularly seen the deers and bats.
