Enquiry details

Dear Steven Gunn Russell

In light of a number surveys yet to be completed, ie wildlife, drainage plans', linkage drawings, FRA survey etc. Is it fair for regulatory bodies and the public to be expected to pass comment on the planning application based on information that is incomplete and that may alter any decision when the evidence/ data is finally available . It is currently impossible to provide a fully informed response based on the currently incomplete data. In light of this I request an extension to the end of public consultation period, or reject the application until all required information is submitted by the applicant, the second part I believe to be the more reasonable action.

I request an urgent response to this issue in light of the imminent end of consultation 07/12/2022

You Respectfully

Mr.Philip Miskell
