Submission: Objection

Comments: The local infrastructure cannot support new homes and residents - quite frankly, the current infrastructure is wholly inadequate.

The volumes of traffic that the future residents would bring would be a detriment to the people of Glossop, adding yet more congestion, pollution, and substantial risk on many levels.

I have children at Dinting School and already find the road a challenge to negotiate during school rush times. The proposed access points would increase the traffic, and therefore the danger to children, which is unacceptable.

The impact on the varied wildlife, the green space, and the environment as a whole is unacceptable. The trees are supporting air quality...whilst houses would detract from it...a very relevant issue given Global climate crises and the COP27 outcomes.

It would be totally inappropriate and reckless to approve any building on this site.
