Submission: Objection

Comments: I object to this proposal.

This area is home to some amazing wildlife, including exquisite species such as meadow salsify, bats and owls.

Further build up and interference in the area will cause the habitat to be lost forever.

I note the current owners of this field are poor environmental custodians, they have left the hedgerow saplings be trampled by the horses. They created an access gate which encroaches into the field with hard-core. Was their a planning approval for this, and the extensive sheds they erected on the field? I fear this contempt for wildlife would continue, but on a larger scale with his development.

This field should remain as farming land or be re-wilded as woodland. Not built up.

Additionally, the lane is not built for traffic, it is single lane with no passing spaces and protected trees on each side. The up tick in traffic would cause a real nuisance and drive cars to pull on to the delicate verges that are home to so many wild flowers, insects and animals.

This is the wrong place for this development. Protect this environment for future generations!
