Submission: Objection

Comments: The transport infrastructure does not support the current housing in the area. This proposal will only exacerbate the

traffic issues and congestion in the area.

The local primary schools are already over subscribed, and therefore the area cannot support an increase in population

Current access to NHS services including accident and emergency as well as in and out patient services are virtually

non existent in the area with the nearest A&E services in Tameside and Stockport this showing that there isn't a local service

The Glossop area has seen an increase in flooding due to new housing developments and therefore I'm concerned

that another development may further increase the risk and number of flooding instances

The environmental impact would be vast based on the notion of each household having a minimum of two vehicles

which they would require due to inadequate public transport services
