Submission: Objection

Comments: The proposed telecommunications installation is a 15-metre high mast, with a wrap-around cabinet at the base of the structure. Generally, I am in favour of 5G masts as they vastly increase network coverage and signal for local residents. However, they need to be sited in the right locations.

I do support the provision of a 5G mast in the Hadfield area, to deliver badly-needed improved coverage, but I do not believe that the proposed site is the right place for the mast.

The proposed location is part of a unique heritage area and as such the nature of the mast would negatively impact on the character of the area.

I have been contacted by a number of concerned residents who are particularly worried that the associated ancillary works, which are normal for this type of application, will have a detrimental impact to the historical town square.

Old Hall Square is a poor choice of location given that it is a unique heritage area of Hadfield. I urge the applicant and the Council to work together to find a more suitable alternative location to site the mast.
