Description of Proposed Works

Please describe the proposed works

This planning application is to replace an existing area of decking and garden steps with new decking and steps. The decking and steps provide access from the conservatory (which is around 20 years old) to the back garden, and from the side of the house to the back garden.

The old decking had been in position for about 20 years, it had several areas of rot, the surface became very slippery in the wet and steps were very steep and had become dangerous. As the sub-frame also had areas of rot, the whole structure was removed. As this house has been a rental property, these safety aspects had become a concern. I have attached photos of the old decking.

The new decking is similar in design but the steps are now much safer, being both shallower and wider. The new decking is made from a composite material which looks like the previous wooden structure but is much less slippery when wet and cannot rot.

I hadn't realised that completely replacing the previous structure would mean a planning application became necessary, which is why I had started work on the new deck. The work is now paused awaiting planning consent.

With respect to the Authority, is the applicant and/or agent one of the following:

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
