Subject: Consultation Response - App ref HPK/2023/0007

Categories:

Application number: HPK/2023/0007
Site address: Hayfield Cricket Club, Market Street, Hayfield, Derbyshire, SK22 2EP

I note that we are included in the list of consultations for this planning application, but have not been contacted by any parties regarding the application, or instructed on how to submit a consultee response. I trust this email is an acceptable form of response.

Whilst I fully agree with the need for dedicated women's changing facilities at Hayfield Cricket Club, I'm concerned that the planned development will only provide a changing room and toilet for ladies, but no showers. It will however provide new improved changing and shower rooms for the men, who already have those facilities. Surely the ladies should be provided with equivalent facilities to the men and that should be the primary purpose of this extension.

The planned extension will obscure the current view from our property of the western side of the cricket pitch with an unsightly rear roof line.

The plans include a significantly extended patio. Throughout much of the year this area outside the cricket pavilion is a popular unofficial gathering place for young people, often late into the night during the summer months. These gatherings are often noisy, disruptive and accompanied by littering, with occasional petty vandalism. I am concerned that the extended patio area is likely to attract larger groups and encourage them to gather closer to the Kinder Road houses which back onto the cricket pitch.

The rear of the cricket pavilion has at times attracted unwanted attention from unauthorised individuals. It has also proved difficult to secure. The planned extension adds to this area, with no apparent security measures to its rear.

Regards,

Phil Chapman
