Submission: Objection

Comments: As per my original objection to this proposal I would like to re-iterate that providing an additional petrol station when there is already one in Chapel and another in Whaley bridge goes against the drive to reduce pollution and to work towards net zero. In addition how is it good for the environment to demolish a perfectly acceptable building which was built less than 10 years ago to achieve this?

In addition I cannot see that they are proposing altering access to the site from that already in place. Getting onto the A6 from

Foresters Way is already an issue at certain times of the day with long tailbacks back to

Hayfield Road, and this is without the potential of significantly more cars wanting to turn into the access road. Access from the A6 is also an issue where you can only have a maximum of two cars wanting to turn right, and any more than this blocks the road back upto the roundabout.

No doubt more people will look to avoid this bottleneck by using Hayfield Road where significant tailbacks already build up and I am concerned that emergency vehicles are going to be caught up in the bottlenecks putting lives at risk.
