Submission: Objection

Comments: This proposal remains one that constitutes Ecocide. We are in a biodiversity crisis and this piece of land constitutes a huge boost to the areas wildlife. I hear a Tawny owl hooting from in there almost every night, and many other birds and insects use the land for shelter. These would be disturbed and driven out by human inhabitation, noise (of construction and inhabitation), cars, pollution.

If High Peak Borough Council are serious about their climate plan, they will not allow open Ecocide in high peak on such valuable ecological land.

Secondly, the levels of pollution from traffic in this town are dreadful. Just down the road at Dinting Vale, the levels of nitrogen oxide are beyond the limit considered safe for human health. Adding more developments into this town will only make this worse.

Please look after the people that already live in this town by providing the sustainable transport infrastructure we need before approving housing for yet more people with their gas guzzlers to move in.

Related to this, the people who already live here have not enough school places and GPs - this development would make the situation worse!!

If this is approved, long term residents who care about the town will be driven out because the strain on local roads and service will just be too much.
